

## About IDA

---

The International Desalination Association (IDA) is the leading global organization dedicated to the advancement of desalination, desalination technology, and water reuse. A non-profit organization and NGO of the United Nations, and official partner of the UN FAO WASAG Framework. IDA is the global hub of expertise, news and information, and professional development for the worldwide desalination industry. In addition to its industry-leading events held around the world and its comprehensive print, on-line and multimedia resources, IDA also provides educational opportunities and information about desalination and water reuse to a variety of constituents, from industry professionals in the public and private sectors to students and the general public.

IDA serves more than 2,600 core members in 60 countries and reaches an additional 4,000 affiliate members that represent scientists, end-users, manufacturers and suppliers, engineers, consultants, developers, financiers, and researchers, representing governments, corporations, and academia. Its growing network of regional and association affiliates located around the world covers North America, Latin America and the Caribbean, the Middle East and Africa, Europe, Asia, the Pacific and Australia.

## About AEDyR

---

AEDyR was created in 1998 after the successful IDA Congress held in Madrid in 1997. This association intends to gather all individuals, companies and organizations dealing with desalination and water reuse in Spain. Back then, the International Desalination Association (IDA) added AEDyR to its member list in recognition of its technological development and its desalination track record. Importantly, AEDyR is one of the world's few non-regional, country-specific desalination associations.

Spain's large Engineering Companies performed an outstanding role at that point, and with the collaboration of a number of individuals, they helped our association take its first steps forward.

## About EDS

---

EDS, an IDA affiliate, is a Europe-wide organization for individual and corporate members including universities, companies, research institutes, government agencies and all concerned with and interested in desalination and membrane technologies for water.

It is a society uniting Europeans interested in promoting desalination, water reuse and water technology. All processes are covered and the wide range of roles and activities involved in the desalination field are included: research, applications, consulting, contracting, operation and maintenance, manufacturing, marketing, economics, legislation. Members are welcome from other regions outside Europe.

IDA International Water Reuse  
and Recycling Conference

Making Every Drop Count

June 24-27, 2018 | Valencia, Spain

in collaboration with

# Bienvenido

The International Desalination Association (IDA) in collaboration with our Spanish Affiliate AEDyR, and with support from our European Affiliate EDS, are very excited to host the second IDA International Water Reuse and Recycling Conference on June 24-27, 2018, in Valencia, Spain. We are honored to conduct this conference under the patronage of Mrs. Liana Ardiles, Director General for Water, of the Spanish Ministry of Agriculture, Fisheries, Food, and Environment.

We must "Make Every Drop Count." The two-day conference will be a combination of plenary, panel and technical sessions focusing on advanced technologies for water reuse and recycling that will make water available to municipal and industrial users. Presentations will address a number of topics including cutting-edge technologies, direct and indirect potable reuse, non-potable and agricultural reuse, water quality monitoring and control, and advanced technologies for joint desalination and water reuse as well as industrial water reuse and recycling. With the support of Mrs. Ardiles, we have invited clients, potential partners, and public utilities from around the world, and we are confident that many of them will attend.

As you may know, the IDA is the global connector for the desalination and water reuse community. We invite you to not only attend this important conference to learn more about the different technologies, applications, and practices but to also showcase your organization as a sponsor and take advantage of the outstanding networking, growth and business-building opportunities that will be available.

Sincerely,

Shannon McCarthy

IDA Secretary General

Domingo Zarzo

AEDyR President, IDA Director and Conference Co-Chairman

Borja Blanco

IDA Director and Conference Co-Chairman

Mike Dixon

IDA Director and Conference Co-Chairman

## Register Now

Non-IDA members:  
**\$925**

IDA and affiliate members:  
**\$800**

Space is limited so register now, before the conference sells out! We look forward to seeing you in Valencia!

For more information contact: [conferences@idadesal.org](mailto:conferences@idadesal.org)

## About the Program

### Panel Discussion Topics will address:

Regulations, Tariffs and Funding for Reuse and Public Acceptance  
Role of Water Reuse in the Water-Energy and Food Nexus

**Technical Program** Sessions will address a number of topics including:

- Cutting-edge technologies
- Direct and indirect potable reuse
- Non-potable and agricultural re-use
- Water quality monitoring and control
- Advanced technologies for joint desalination and water reuse
- Industrial water reuse and recycling

## Conference Social Events

### Welcome Reception

On Sunday, June 24th, all delegates are invited to check-in and collect conference material in the afternoon and attend the welcome reception at the Melia Valencia hotel.

### An Evening at the Palace

Conference delegates will enjoy an evening networking event on Monday, June 25th at one of Spain's most iconic architectural sites, the Valencia Arts and Sciences Palace designed by renowned Valencian architect Santiago Calatrava. The evening will include epicurean delights coupled with a unique cultural performance by regional singers and dancers. Bus transfers to the Palace will leave directly from the Melia Valencia hotel.

## Who Should Attend

IDA's Water Reuse and Recycling Conference: Making Every Drop Count will bring together stakeholders from all parts of the global water reuse industry, including end users (utilities and industries), researchers, consultants, members of academia, manufacturers, and suppliers of complete systems and components including chemicals and materials, as well as representatives from Governmental, Financial, Development and Multilateral Agencies.

## Conference Chairmen

- Mr. Borja Blanco, Spain
- Dr. Mike Dixon, Canada
- Dr. Domingo Zarzo, Spain

## Technical Program Committee Members

- Mr. Leon Awerbuch, USA
- Mr. Guillaume Clairet, Canada
- Mr. Sylvain Donnaz, France
- Dr. Jörg Drewes, Germany
- Mr. Joan Galtes, Denmark
- Dr. Blanca Jiménez-Cisneros, France
- Prof. Maria Kennedy, Netherlands
- Mr. Ralf Krueger, Germany
- Ms. Melissa Meeker, USA
- Mr. Wade Miller, USA
- Mr. Meहुल Patel, USA
- Mr. Rodrigo Segovia, Spain
- Mr. Troy Walker, USA
- Mr. Greg Wetterau, USA

## Venue and Hotel

The Meliá Valencia, one of the leading hotels of the city, located in the heart of the center. Nearby you will find exotic botanical

gardens, the iconic Palace of Arts and Sciences, beautiful beaches, and the world-renowned port of Valencia.
